

FT EUSTIS GARRISON LEAN SIX SIGMA FLASH UPDATE

APRIL 2009

Let Lean Six Sigma Work For You

Did you know?

All IMCOM employees are required to take Lean Six Sigma Awareness Training. Individuals who have taken an IMCOM LSS training course have already satisfied this requirement. Training will be available in June at the Fort Eustis Club. More to follow.

About Lean Six Sigma:

What makes a Good Project?

- ❖ Places where there are failed audits or unmet specifications or regulations
- ❖ Places where employees are assigned to cover Quality issues
- ❖ Any areas where rework occurs
- ❖ Anywhere throughput is less than expected
- ❖ Any process with down time
- ❖ Any process where labor is added to meet Requirements
- ❖ Processes where costs are higher than expected
- ❖ Any important CLS metric where your area is observing unacceptable scores

How LSS Is Working for Ft Eustis

Black Belt News:

Ed Magary has completed the first phase of becoming a Certified Master Black Belt. On 13 March 2009, Ed completed the three week Master Black Belt course. He now must mentor two Black Belt candidates through certification, complete a second Black Belt level project, and teach the entire Black Belt Program of Instruction to fulfill the Army's certification requirements.

Green Belt News:

Wanda Raney has completed her Green Belt certification project and is now in the process of submitting her certification package. In the next issue, we should be congratulating her for successfully completing her Green Belt certification. Wanda's project to streamline the Operations Order process resulted in a more efficient, transparent process.

Certifications

No certifications to report this issue.
